

Caring for your T-Shirt Quilt

Fabrics used in making the quilt are quality 100% cottons, which were preshrunk prior to the sewing process. Because most quilts are usually a combination of light and dark colors, we recommend using a Shout "Color Catcher" sheet in the wash cycle to prevent some of the dark colors bleeding onto the lighter shirts. The quilt can be machine washed in lukewarm water and tumble dried on a very low heat setting. Most quilts can also be dry cleaned if preferred.

Important! If your quilt has any photo transfer squares, please check with your dry cleaner to see if the transfers will be able to withstand the chemical process.

Please note that since washers/dryers each have their own heating/drying characteristics and settings, we cannot guarantee your results. In addition, if you have any "varsity letters" or any other non-traditional items sewn into the quilt we cannot guarantee that they will withstand either a machine wash/dry or dry cleaning process.
